Provincial Mental Hospital

PROVINCIAL MENTAL HOSPITAL

PONOKA, ALBERTA.

THE HON. R. G. REID,

Minister of Public Health,

Edmonton, Alberta.

SIR:—I have the honour to submit to you the Report for the year ending December 31st, 1921, being the Eleventh Annual Report of the Provincial Mental Hospital, Ponoka.

On the first day of January, 1921, there were in residence 698 patients, 444 males and 254 females. At the close of the year there were 776 patients,—496 males and 280 females, an increase of 78.

The admissions were 185 males and 91 females, a total of 276.

The discharges were 143, as follows:—

	Male	Female	Total
Recovered	63	35	98
Improved	21	15	36
Not improved	7	2	9
Total	91	52	143

The above discharges include 13 deportations and 6 transfers, as follows:—

DEPORTATIONS

	Male	Female	Total
England	2	..	2
Italy	1	..	1
Switzerland	2	..	2
United States	5	3	8
Total	10	3	13

	Male	Female	Total
Edmonton, Home for the Mentally Defective	..	1	1
Manitoba Penitentiary	1	..	1
Ontario	2	..	2
Saskatchewan	2	..	2
Total	5	1	6

During the year 76 males and 49 females, a total of 125, were sent out on probation, and of the total number on probation 13 males and 6 females were returned.

The recovery rate, based on the total admissions for the year, is in the case of the males 34.05 per cent., and in that of the females 38.46 per cent. The recovery rate, therefore, is for both sexes 35.50 per cent.

The deaths numbered 59, viz., 45 males and 12 females.

The death rate, based on the total number under treatment, is for the males 9.35 per cent., and for the females 5.16 per cent., or for both sexes 7.84 per cent.

With the exception of minor ailments and a few cases of pulmonary tuberculosis, the general health of the patients has been excellent.

A pathological laboratory, with access from the first floor, was built over the original kitchen, now used as a staff dining room, and when fully equipped will not only stimulate interest in the work, but will be a valuable accessory to diagnosis.

The Nurses' Home which was commenced in the spring will be ready for occupation in a few weeks. Provision has been made for forty-three nurses, including the matron and dietitian. This should meet all our future requirements.

The septic tanks are being reconstructed along more modern lines whereby the sewage, after being roughly screened, will be subjected to aeration by compressed air, thus ensuring under normal conditions an effluent with a minimum of organic matter.

It has long been our opinion that a social service worker would render invaluable assistance in investigating the home conditions of patients, the factors leading up to their mental attack, and other clinical data; as well as making an inventory of their real and personal property, and any information that might be required by the Department of Lunatics' Estates in arranging for the care and maintenance of such property in the absence of the owners. So far as practicable the after supervision of those discharged on probation would also be a part of his duties.

Since occupation, especially if congenial, is necessary for the promotion and maintenance of a healthy mind, we would emphasize the importance of providing a suitable building, and one or more instructors in the various forms of occupational therapy, such as weaving, basket-making, wood-carving, carpentry, etc. As heretofore stated the primary object is not commercial gain, but an endeavour to encourage the patient to divert the energy accompanying his morbid ideas and actions into directions of greater social value, or, at least, into directions less harmful to himself.

The kitchen needs re-arrangement and the addition of some new equipment to bring it up to our present requirements. Another oven should be installed in the bake-shop, as the two in use, although of a good type, are insufficient for our purposes.

A careful survey of the power-house and other utilities reveals that the plant is inadequate for our future needs. Amongst other suggestions it is strongly recommended that two of the older boilers be replaced by two Babcock & Wilcox boilers of 125 H.P. each.

Owing to the exceptionally dry seasons, and the low level of the water in the wells, it has become increasingly difficult to supply a sufficient amount of water for the growing needs of the hospital. To meet this emergency it is proposed to drill a fourth well near the water reservoir.

As the average increase in patients has been about 75 per annum during the past ten years, it will be impossible with our present accommodation to take care of more than a small proportion of this number without dangerously overcrowding all the wards and dormitories. It is therefore urgently recommended that work on the proposed unit for 200 male patients be commenced as early as possible this spring and completed without delay.

For three years in succession the drought and high winds have hindered the laying out of the grounds in front of the hospital. Nevertheless the improvements have been extensive and our plans are nearer realization.

The heating system of the green-house has been re-arranged, thereby making for greater efficiency and saving a considerable amount of steam piping.

The season in this district was more favourable than anticipated, and notwithstanding the late onset of rains the yield for both garden and field crops was well above the average, and harvested in good condition.

Our experiment with sunflower ensilage as a feed for both milk and beef cattle proved so successful last winter that a second silo with a capacity of 185 tons was erected to the east of the entrance of the barn.

Milk is the most important item in our dietary, particularly for acute mental cases, epileptics, and the sick. But for a considerable time the supply from the farm has fallen short of our requirements. As soon as this was fully realised the construction of a large modern barn to accommodate 120 cows was at once begun about half a mile east of the hospital on a well-drained site with a commanding view of the surrounding country. In addition, four car loads of good grade Holstein cows were imported by the Agricultural Department from the east, and two young Holstein bulls of good quality were sent from the Stony Plain Experimental Station. The intention is that this type of dairy cow shall ultimately replace the present conglomerate herd of milk cattle.

Fresh eggs are also an important item in the dietary, but so far the farm has failed to supply even a small proportion of our requirements. The application, however, of modern methods of egg production should solve the difficulty, and we suggest that as the hatching season is near at hand this question should receive due attention.

Early in the year a section of land was purchased about four miles to the south-east of the hospital. One hundred and twenty acres of this was cleared of brush, broken and prepared for seeding. This section was acquired as it had become apparent that the amount of good cropping land already in our possession was limited.

The yearly average net cost per capita is \$315.49.

The daily average net cost per capita is 86 1-2 cents.

In concluding we desire to express our indebtedness to the various departments for their support and assistance.

I have the honour to be, Sir,

Your obedient servant,

E. H. COOKE,

Medical Superintendent.

Table No. 1

Provincial Gaol

Lethbridge

LETHBRIDGE, January 10th, 1922.

HON. ALEX. ROSS,

Minister of Public Works,

Edmonton, Alberta.

SIR:—I have the honour to submit the Eleventh Annual Report of the Provincial Gaol, Lethbridge, for the year ending December 31st, 1921, together with the usual Statistical Tables, which I am sure you will find interesting.

The average prison population for the past year has been 128.865 being an increase of 26 over the previous year and would have been much larger had we not stopped all prisoners coming to us from Calgary Police Court, during July, August, September and October—owing to our crowded condition, during the summer months.

By stopping the supply from this source, our numbers dropped, so that we were able to thoroughly disinfect, clean, paint, and kalsomine our Cell House. This cannot be done when we are crowded and must be done every year to preserve proper sanitary conditions.

The general health of the men has been good. We have had two or three patients that caused us considerable anxiety on account of their physical condition, but fortunately there were no deaths during the year. The outdoor work on the farm provides plenty of fresh air and exercise and is conducive to good health—physical, mental, and moral.

I regret to have to report another very dry season throughout this district, with decreased yields from our farm crops as a natural result. We put on extra men to irrigate our crops and used all the water we could get and did our best to secure as large returns as possible from our farm, but the result was disappointing. The yield per acre was not up to our expectations. When we get practically no rain during the growing season—the problem is to get the irrigation water distributed over the land at the proper time.

It is a huge undertaking, as the ground is so dry we cannot irrigate a large acreage per day. We did our best and while disappointed in results, we have the satisfaction that our crops were the equal and perhaps superior to any throughout this district. Our potatoes and vegetable crops were good and we shall have some to dispose of as usual.

We depend largely on our farm crops—especially wheat—for our revenue. The yield per acre of wheat was lower than we had hoped—although it averaged 22 bushels on both dry and irrigated land, but the great drop in price has resulted in tremend-

ous drop in our revenue for this year. On wheat alone we received \$7000 less revenue than the previous year—this item accounts for the increase of 20 cents per capita this year.

The prices of our live stock, horses, cattle, etc., have materially declined as well.

Our farm is not naturally level and easily irrigable—so we have to put lots of work on fills to carry the water across low portions. This has been the chief work carried on this year, as irrigation water is our only salvation during these dry seasons.

We have painted all our out-buildings and cell house and kitchen during the year.

In many ways this was the most disastrous year in our history: (1) A prisoner escaped with my car, which meant extra expense in replacing same; (2) We lost our large horse barn and contents by fire—cause unknown—but this necessitated increased expense, even in providing temporary quarters to house the animals.

We are grateful to your department for the splendid stable which is now being built to replace the old one and for the cattle barn which will be proceeded with in the near future.

We need in the worst way a large implement shed to store our farm machinery away, and a proper building for carpenter and blacksmith's shops to repair same.

If we could get these new buildings this year—the chimney on our kitchen raised so as to overcome smoking in the kitchen and a small addition to the kitchen to provide storage for flour and vegetables—we should be in good shape to carry on.

I have already called your attention to the causes of our decreased revenue for the year. While the prices we had to pay for most of the supplies, clothing, etc. have not materially declined, our per capita cost is necessarily increased to 90 cents per day.

The past year has been a very trying one, but we are hopeful that conditions will become normal before long, and we look forward to the future with courage.

I desire to thank you for your interest in our work here, and appreciate the help afforded us by all the departments with which we have had to transact business.

I have the honour to be, Sir,

Your obedient servant,

J. H. RIVERS,

Warden.

Provincial Gaol

Fort Saskatchewan

PROVINCIAL GAOL,

FORT SASKATCHEWAN, January 17, 1922.

THE HON. ALEX. ROSS,

Minister of Public Works,

Edmonton, Alberta.

SIR:—I have the honour to submit herewith my eighth annual report of the Provincial Gaol at Fort Saskatchewan for the year ending December 31st, 1921, together with the financial report and statistics of the Gaol population.

The daily average for the past year was 188.9, an increase of 30.3 over that of 1920, due in part to the transferring of so many prisoners from Calgary and Drumheller districts, owing to the Gaol at Lethbridge being overcrowded.

The general health of our prisoners has been good, and I am glad to report no deaths this year.

I regret to inform you that we had two escapes during the year, both prisoners, however, were re-captured within a few days.

Our building operations during the year consisted of a new steel and concrete building for the female department. This was much needed, as the old building was overcrowded, unsanitary, and hard to heat.

Our farming operations in 1921 were not as successful as in former years, owing to the unusual dryness; but we received a fair return of all kinds of grain and vegetables, of which we have a good supply on hand for our own use, and some to sell.

Our wheat averaged 27 8-11 bushel per acre, oats 58½, registered barley 59 1-6, hull-less barley 43⅛. The sunflower crop was a great success, and I think this kind of ensilage makes a cheap ration for both milk and beef cattle.

We were able to plough only 28 acres last fall, owing to the soil being so dry. This will put us back in our spring seeding, but if we can obtain more power, we should be able to manage our usual crop for the coming year.

I have in conclusion to thank you for your interest in this institution, and for the many courtesies extended to us, by yourself and staff.

I have the honour to be, Sir,

Your obedient servant,

HARRY A. DRIGGS,

Warden.

Hospital for Returned Soldiers

Red Deer

HOSPITAL FOR RETURNED SOLDIERS,

RED DEER, ALBERTA, January 3rd, 1922.

HON. ALEX. ROSS,

Minister of Public Works,

Edmonton, Alberta.

SIR:—I have the honour to submit herewith the annual report for the year 1921, being the fourth annual report for the Hospital for Returned Soldiers, Red Deer, Alberta. The usual statistical tables are attached.

On the first day of January, 1921, there were 110 male patients in residence. During the year there were two admitted as transfers from the Provincial Mental Hospital, Ponoka. Discharges numbered 4. Transfers to other provinces, 1. Deaths, 2. Total remaining in Hospital, December 31st, 1921, 96.

The physical health of the patients throughout the year has been exceptionally good. The number of discharges with recovered or improved mental health, bears a fairly accurate relation to prospects for mental recovery in future years of patients now in residence.

For the fourth consecutive year the garden has been a marked success. The volume of produce produced has increased nearly 100 per cent. on the same acreage since the institution was opened in 1918. The artistic effects of the grounds show marked progressive improvement over previous years. The fact has produced much favourable comment by the press and public in general. A list of general improvements by the gardener and staff will be found itemized at the conclusion of the stock.

The new procedure adopted last year in relation to hospital returns has simplified matters considerably, and has aided naturally in checking in internal administration.

The per capita this year has been reduced from \$1.15 to \$1.10. Average number of patients in residence, 96. Staff and supernumary, 22. Total, 118. Yearly cost per capita, \$401.09. Total cost per capita, per diem, \$1.10.

In conclusion, the staff wish to convey to yourself, and to the various departments, their sincere thanks for the support and assistance rendered.

I have the honour to be, Sir,

Your obedient servant,

D. L. DICK,

Medical Superintendent.
